Eden Anthony Unveils "Ebb & Flow"

In Ebb & Flow, Eden Anthony draws parallels between life's rhythm and her artistic process, selecting forms and techniques that oscillate between harmony and chaos. Edens work is texturally inspired by ocean life, as the beach has always been a place of peace and reflection for her. The serene coil-building process, resulting in dynamic silhouettes, takes a drastic turn as the chaos and unpredictability of the raku firing process take over. This technique, echos life's unpredictability, alters each piece, and embodies the inevitable fluctuations of life's currents. Her sculptures are a tangible reflection of transformative beauty.
