**MAC OS X secure@hood setup instructions**

**Please ensure your computer meets the following criteria in order to successfully make a connection to this network:**

- Have an AirPort Extreme wireless card (old AirPort cards from 2002 and earlier do not work)
- Support 802.11g/n

**Step 1:**
Click on the AirPort icon and select `secure@hood` from the list of available networks. (It may take a few seconds for the list of available networks to be populated.)
**Step 2:**
In the window that appears on screen enter your Pergola user name and password information.

**Step 3:**
First time users will be prompted about server certificate trust settings. On the screen that appears click the Show Certificate button to show certificate details.

Step 4:

Once your authentication completes, you will be connected to the secure@hood wireless network.
