

Forging the Future

The Campaign for Hood College

Campaign Update
Summer 2022

A Remarkable Community

Four years ago, Hood launched *Forging the Future: The Campaign for Hood College*, a \$50-million capital campaign, the most ambitious in the College's history. Today, we are happy to share that, thanks to a remarkable community of generous Hood donors, we are approaching our new goal of \$65 million, \$15 million more than the original target, which we surpassed in 2021.

Thanks to donors who supported Hood through this campaign, the College has strengthened its impact in the community and in higher education and has advanced its academic mission by:

- Establishing the George B. Delaplaine Jr. School of Business and launching Data Driven Frederick, an analytics center that provides data to regional businesses, nonprofits and other organizations to inform policy development and decision-making that benefits the Frederick community. It also gives Hood undergraduate and graduate students opportunities to learn and work with community partners, analyzing economic trends, health information and more.
- Founding the Ruth Whitaker Holmes School of Behavioral and Health Sciences, a strategic undertaking at a time when the demand for nurses and other health professionals is dramatically increasing. Through a partnership with Frederick Health, the hospital and healthcare system that is one of Frederick County's largest employers, Hood is strengthening and expanding health-related academic and experiential programs including nursing, public health, social work, nutrition and counseling.
- Providing funds for Hood's endowment to support scholarships, high-impact learning opportunities, faculty research and new academic programs.

Still, there is more to be done—and we are asking all members of the Hood community to join in this groundbreaking effort to support the College and expand its mission. In addition to the initiatives noted above, expanding and modernizing the Hodson Science and Technology Center remains a priority. The three-story addition will provide more classrooms, specialty labs, study space and faculty offices, all necessary to accommodate the College's growth—and its growing prominence in the sciences. Hodson will house the new Biomedical Research and Training Center, where students will receive specialized hands-on-training to prepare them for cutting-edge work in medical research and biotechnology.

True to our mission, Hood College remains committed to serving as the college of choice for students seeking an excellent, holistic, liberal arts and sciences education. We offer this in an inclusive environment that prepares graduates for personal and professional achievement leading to purposeful lives of responsibility, leadership, service and civic engagement.

We invite you to join us on this journey. Thank you for investing in our future.

Andrea E. Chapdelaine, Ph.D.
President

Judith E. Messina '66
Chair, Board of Trustees

Progress Report

As of June 30, 2022, more than 4,250 generous donors have committed \$60.2 million to strengthen Hood for generations to come. Moving into the final year of the campaign, we invite all members of the Hood community to make a campaign gift.

Our top priorities for funding this year are growing the Hood Fund, renovations and expansion of the Hodson Science and Technology Center and support for high-impact student learning.

Campaign Priorities

TOP THREE PRIORITIES FOR FINAL YEAR OF CAMPAIGN

Grow the Hood Fund	Increase the College's annual source of unrestricted support and advance all aspects of the College's mission
Renovate and Expand the Hodson Science and Technology Center	Support student enrollment growth in the sciences with state-of-the-art facilities, modern equipment and technology
Ensure High-Impact Student Learning	Enable every student to have at least one life-changing experiential learning opportunity

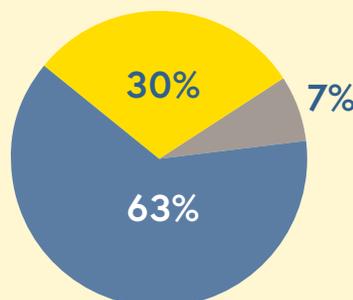

PRIORITIES FULLY FUNDED

Transform the Library into a Learning Commons	Create academic hub that enhances learning and the student community
Increase Student Scholarships	Change lives by improving the College's affordability, accessibility and inclusivity
Expand the George B. Delaplaine Jr. School of Business	Increase fast-growing business programs and spur social entrepreneurship
Establish the Ruth Whitaker Holmes School of Behavioral and Health Sciences	Provide students with degree programs that meet the growing demand for health professions
Support Faculty in Teaching and Research	Engage students and faculty in meaningful research and discovery

Donor Makeup

Of the 4,258 donors to the campaign to date,

- 63% are alumni,
- 30% are non-alumni and
- 7% are corporations, foundations, fundraising consortia and others.

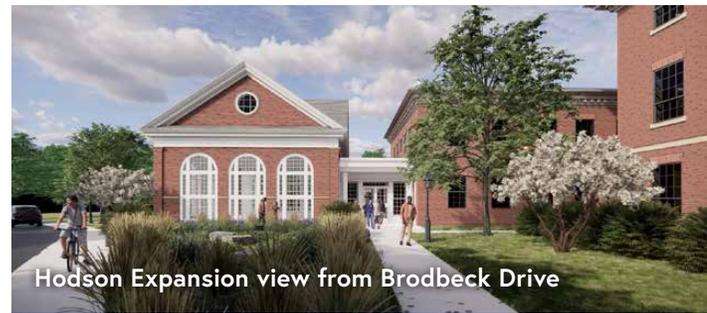

TRUSTEE MRS. HOGAN ESTABLISHED THE EDITH HOWARD HOGAN '59 FUND FOR NUTRITION WITH A LEADERSHIP GIFT.

The new graduate program in nutrition science has earned national accreditation and is part of the Ruth Whitaker Holmes School of Behavioral and Health Sciences. The fund will support faculty recruitment and training, academic scholarships, curriculum development and student research.

Hodson Expansion view from Brodbeck Drive

What Forging the Future Looks Like in the Hodson Science and Technology Center

Extraordinary faculty, students and programs deserve equally extraordinary spaces. Transforming the Hodson Science and Technology Center will provide the classrooms, specialty labs, study spaces and faculty offices needed to accommodate the College's growth in the sciences, overall, and specifically health sciences. The renovated facility will also house the new Biomedical Research and Training Center that will support Hood students' education in biotechnology and biomanufacturing. Graduates will be prepared to advance their knowledge, address the most pressing issues in global health today and conduct cutting-edge research in the biomedical field.

Our Vision: *Building on Hood's core strengths in the sciences and liberal arts, the renovated Hodson Science and Technology Center will foster growth in academic programs and integrate research with practice, leveraging our rigorous curriculum and our extensive partnerships in research—locally, regionally and globally.*

Hood has been a leader among our peer liberal arts colleges in developing new academic programs in response to market demand and regional workforce trends. The Bachelor of Arts in Sustainability Studies, launched in fall 2021, required specialty labs to support the three areas of focus—water, energy and food. A computer science lab, constructed in an annex building, partially accommodated growing graduate programs in cybersecurity and bioinformatics. Nursing has become

the largest major with an enrollment demand that exceeds current capacity.

Hood successfully launched an undergraduate degree in public health that is poised to be Maryland's only accredited Bachelor of Arts program in the field, while our new graduate program in nutrition science just earned national accreditation. Soon, we will add a master's in health informatics.

Create the Biomedical Research and Training Center

The Biomedical Research and Training Center will provide a unique opportunity for students to receive specialized hands-on training, coinciding with current industry needs. Led jointly by Hood College faculty and scientists from regional companies, the Center will place students at the forefront of innovations in science, technology and healthcare to ensure they have the expertise needed to propel the biotechnology industry into the next generation. Partnerships include Gilead Sciences subsidiary Kite Pharma, Leidos Biomedical Research, AstraZeneca and the State of Maryland, to name a few. The Center will prepare students to enter the workforce immediately after graduation, possessing the skills necessary to meet pressing needs in manufacturing, research and development of new therapies and treatments.

Through conferences, symposia and other collaborative programs, the Center will open Hood's campus to a world of renowned scientists, scholars and students.

At the helm of the Center will be an executive director, whose position is being funded through an endowment established from Ruth Whitaker Holmes '55, H'93, Ph.D., and a State of Maryland E-Novation grant.

Hodson Expansion and Renovation

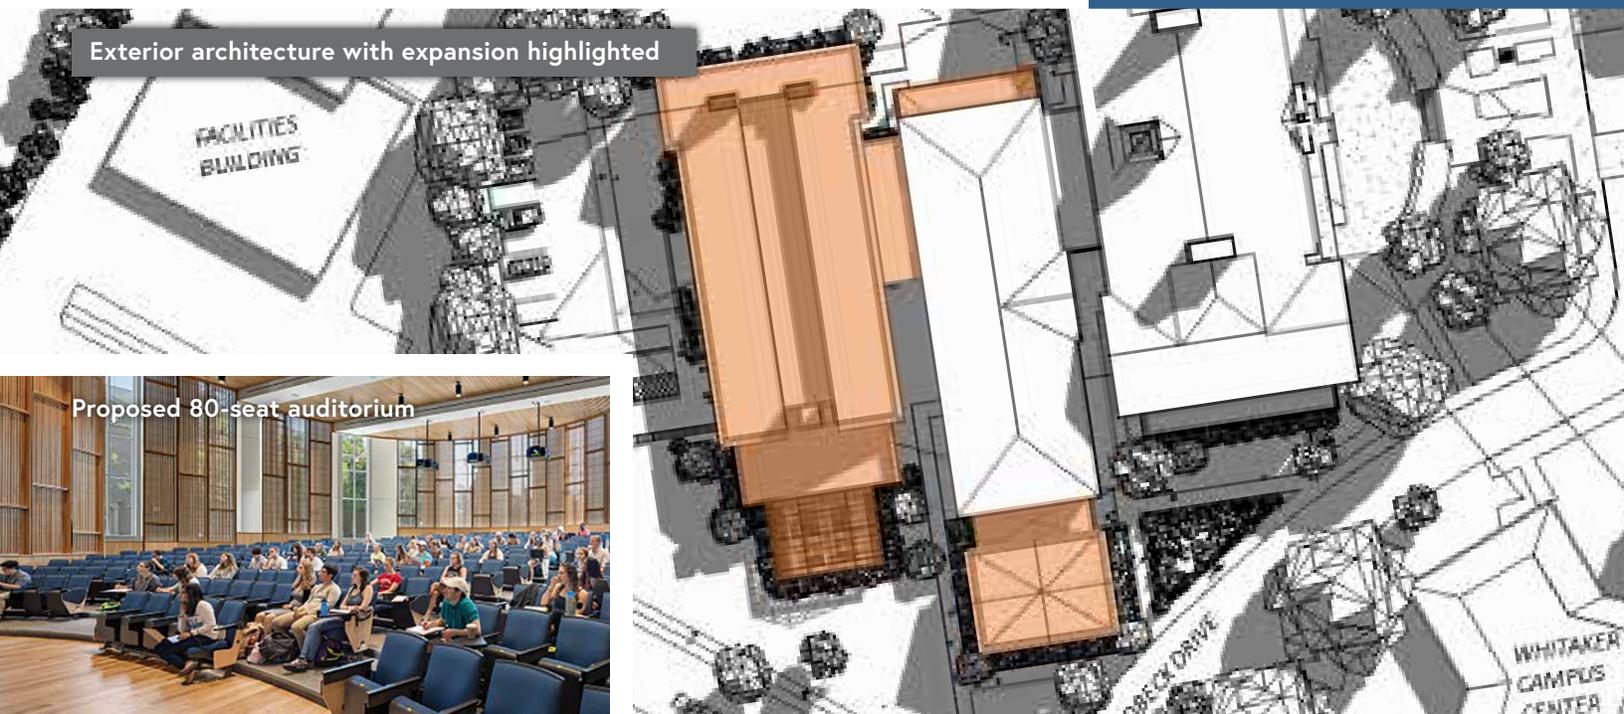

The proposed expansion to the Hodson Science and Technology Center is a three-story, 32,000-square-foot addition that will provide the instructional and laboratory space needed to accommodate program growth. It will also include significant renovation of existing classrooms and lab spaces. Consistent with Hood's commitment to high-impact teaching and learning, the expansion and renovation will create "wet lab" training spaces, conference and meeting spaces, classrooms with virtual technology, additional offices, an 80-seat auditorium and a greenhouse.

The design concept reflects Hood's dedication to preparing graduates with the skills necessary to successfully pursue careers in science and technology. Among those skills are interdisciplinary thinking, creativity and teamwork. Spaces in the new building have been purposefully designed as so-called "maker spaces," which will encourage students from all disciplines (biology, biochemistry, chemistry, computer science, mathematics, coastal studies and sustainability studies) to work in partnership and develop innovative solutions to complex problems.

**PRESIDENT CHAPDELAIN
AND DR. ETHAN
DMITROVSKY, DIRECTOR
OF THE FREDERICK
NATIONAL LABORATORY
FOR CANCER RESEARCH
AND PRESIDENT OF LEIDOS
BIOMEDICAL RESEARCH.**

"This is such an exciting opportunity to bring scientists and faculty together to learn and share ideas on the forefront of the biomedical sciences," said Ethan Dmitrovsky, M.D. at the signing of the Memorandum of Understanding between Hood College and the national laboratory.

Exterior architecture with expansion highlighted

Proposed 80-seat auditorium

THE BETH DARROCH COGGINS '81, P'11 MEMORIAL SCHOLARSHIP TRAVEL FUND WAS CREATED BY HER HUSBAND, CDR KENNETH "KC" COGGINS, USN (RET.), AND THEIR DAUGHTERS, KRISTINA COGGINS HECK '11 AND JULIE COGGINS DUNLAP TO PROVIDE STANDOUT HOOD STUDENTS WITH THE OPPORTUNITY TO STUDY ABROAD.

"Beth loved to travel, loved Hood and loved her students. Though we miss her very much, we know Beth would be overjoyed to share the experience of living abroad with Hood students, present and future. The travel scholarship is targeted at students on need-based financial aid, who are unable to afford the travel expenses associated with the study abroad experience," said her husband of 33 years, Kenneth C. Coggins, P'11, W'81.

How Philanthropy Has Changed Students' Lives

A top priority of the *Forging the Future* comprehensive campaign is to increase resources for high-impact learning—internships, study abroad, service learning, fieldwork and research with faculty.

High-impact learning opportunities carry significant costs, for both students and faculty. Internships and research experiences often occur in the summer, when many students must work full time to earn money for college tuition. Students and faculty incur costs related to travel, housing and supplies. Further resources are needed to support curriculum development and advising. To encourage our students' full engagement in high-impact learning, Hood offers financial assistance for these programs. However, the needs of students and faculty far outpace current College funding.

Here are a few examples of how this support has enriched the experiences of three Hood students traveling abroad:

Linda Redd '23

Linda is a pre-dental studies biology major and Chair of the Board Scholar. She recently received funding to participate in a mission trip with the International Medical Relief organization. Linda traveled to Poland, where she has been providing aid for Ukrainians displaced by the conflict with Russia. At a refugee camp, Linda has worked alongside dentists from around the world. In addition to offering dental care, she teaches classes to children about oral hygiene.

Linda says working with a vulnerable population is challenging but rewarding, and she is grateful that Hood has given her this opportunity to make a difference and help people, while gaining real-world experience in the field of dentistry. Linda says dentistry combines her love of science with the desire to care for people who have special needs.

Greighson Rowe '22

Greighson received her degree in psychology and Spanish. She studied abroad in fall 2021 at the University of Seville, Spain. Living with a host family, she was fully immersed in the language, which built her confidence her language skills and expand her academic experience. This was Greighson's first visit to Europe, and she was able to travel to France, Portugal and Germany.

Greighson believes the experience was invaluable to achieve her long-term goal of becoming a mental health professional with a focus on Spanish-speaking and ethnic minority populations.

Stephanie Villalobos '23

Stephanie is a double major in law and criminal justice and French. She is a member of the Honors Program and spent the spring 2022 semester in Paris, France. The opportunity to study abroad allowed Stephanie to achieve many goals that she had set for herself. First, to become more comfortable with public speaking,

Forging the Future: Expand access and opportunities

At Hood, we know the value of learning by doing and have a strong history of high-impact learning. This is rooted in our enduring motto:

Corde et Mente et Manu

With Heart and Mind and Hand.

LINDA REDD '23 | INTERNATIONAL MEDICAL RELIEF ORGANIZATION

"I am very blessed to have received support from Hood. Dental care is a necessity that is often overlooked, and I want to supply that need to people who do not have access to it. The most rewarding part of my work has been seeing the resilience of the children in the refugee camp."

GREIGHSON ROWE '22 | STUDY ABROAD

"This experience was something I will never forget, and it is a great gift to have a second home all the way across the world. This opportunity would not have been possible without the financial support I received from a Hood travel abroad fund. Thank you so much to all who contribute to Hood College's high-impact learning opportunities!"

STEPHANIE VILLALOBOS '23 | STUDY ABROAD

"This program played a pivotal role in developing my communication skills. I actively participated in open class discussions, explored travel opportunities to foreign markets and historical sites, and surrounded myself with a native French-speaking host family, all of which significantly enhanced my French-speaking capabilities and interpersonal skills."

especially in French. Second, to be more open to change. Third, to explore the world outside the classroom in Paris and nearby cities. And finally, to integrate into the French culture.

Stephanie is extremely thankful for the once-in-a-lifetime experience. She received travel abroad funds from the Shirley Conner Hardinge '44 Center for Global Studies and the Susan Whaley '74, J.D. Study Abroad Fund. Stephanie has received additional awards, including the Founders Scholarship, the Judge Edward S. Delaplaine Scholarship, the Honors Program Scholarship, the Helen Burton Shelton '40 Scholarship and the Florence A. Pastore Memorial Award.

*DECEASED

Hood received \$5 million from the State of Maryland E-Innovation Initiative Fund

Five grants to grow our science program:

Endowed Director of the Biomedical Research and Training Center to establish and grow the Center with a focus on providing STEM training opportunities.

Endowed Dean of the School of Behavioral and Health Sciences to develop cutting-edge programs in healthcare professions, expand our contributions to public health in the community and deepen our ties with Frederick Health.

Endowed Chair of Sustainability Studies to grow the program and increase research and educational collaborations in the areas of watershed sustainability, biofuel development and sustainable food systems.

Endowed Director of Advanced Bioproducts Research and Education to develop and form a cluster of biofuels research in partnership with industry, government and other educational institutions.

Endowed Chair of Business and Project Management to develop a project management certificate focused on life sciences, cybersecurity, computational sciences and health sciences.

"As a first-generation college student, receiving a Hodson Trust Scholarship changed my life. My four years at Hood allowed me to pursue my educational goals, to learn from professors who really cared about me, to think independently and to develop a broader perspective of the concepts of citizenship and service to others. Now it is my turn to give other deserving students a chance to realize their dreams."

JACQUELINE ANN WAKELING '52

Jacqueline Ann Wakeling '52 planned for a significant estate gift to establish an endowed fund to support students majoring in science, math and technology with high-impact learning opportunities as well as the expansion and renovations of the Hodson Science and Technology Center. Jackie was an economics major and had a very successful career in finance with Crane & Co., Chemical Bank, Bank of America and Comsat, a communications satellite corporation formed in 1962 by Congress.

SUSAN HAMMER '69

"Now in my 70's (how did that happen?), I knew I'd be required to take a Required Minimum Distribution from my traditional IRA. When I learned that I could contribute that R.M.D. to Hood, not pay tax on it and also declare that amount as a charitable deduction, it was a win-win. I worked with Hood College to set up the process and designated the Hood Fund and High-Impact Practices for my gift. It was a very satisfying experience."

Hearst Foundations Award Hood

Hearst Foundations awarded Hood a \$100,000 grant to expand the Summer Research Institute and to increase the student stipend.

"It is so funny how life works. I was set to attend a small liberal arts college in Ohio, even had a roommate, until I learned that the cost of the school would change my plans. I was fortunate that Hood had reached out to me through the recruiting process and all the pieces fell into place for me to land on campus. The cost of tuition is real and often times a deal breaker. Our hope with our endowed scholarship that we created as part of the *Forging the Future* campaign is for other young adults to realize the dream of becoming a Hood student and growing to their fullest potential with the embrace of the Hood community."

OLIVIA G. WHITE, P'07, P'14, H'20

"I believe in Hood College. Having spent 28 years at Hood and having worked with thousands of students, I know the quality of this education and the impressive graduates she produces. The College's commitment to rewarding academic excellence and providing financial support for nearly every student inspired me to establish an endowed scholarship. It gives me great joy to meet the recipient each year and I am comforted in knowing that the College continues to attract and retain students who are making a difference in this complicated world in which we live."

The Kahlert Foundation Provides Simulator for Nursing

The Kahlert Foundation provided \$50,000 for a geriatric patient simulator for the nursing program to replicate clinical practices to develop critical thinking and clinical decision-making skills.

Forging the Future

The Campaign for Hood College

Forging the Future: The Campaign for Hood College invites alumni, friends and supporters who believe in the College's future to invest in it. We seek \$65 million in philanthropic support to provide more scholarships, ensure that every student graduates world- and work-ready, and increase future support for our faculty. We will develop new degree programs that meet emerging needs and create new spaces in which to deliver them. By growing our endowment, we will strengthen Hood College for generations to come.

For additional information about the *Forging the Future* comprehensive campaign, please visit

hood.edu/forging-future
