

Sustainability Studies (B.A.) Student Learning Outcomes

1. Understand and clearly discuss how concepts of sustainability are connected to issues of social justice, the environment, and the economy at both local, national, and global levels.
2. Evaluate complex environmental issues from multiple perspectives to illuminate optimally sustainable solutions.
3. Employ skills and analytical methods that align with the nexus approach to Sustainability Studies.
4. Explain how sustainability relates to their lives and their values, and how their actions impact issues of sustainability.
5. Demonstrate the ability to be an agent for institutional change toward greater sustainability by promoting and supporting new processes and paradigms within diverse organizations.
